

Good afternoon parents,

My name is Nahian Sharif, and it is my honor to be the teacher of your child. I am a computer science graduate who is currently pursuing a master's degree in computer science at Rice University. This year will be an exciting time for all of us. We will study Computer Science in preparation for the successful completion of the state's standardized tests next spring. I have planned many activities throughout the course of the year that are designed to help your child succeed academically, not only this year but also in the future.

Students and their parents or guardians are naturally curious about the amount and types of homework to be assigned this term. Usually, the important activities will be done in class. However, the unfinished work will be their homework. On the other hand, I highly recommend my students to practice their programming skills. The more they practice, the better it gets for them to answer interview questions easily and confidently.

As for the classroom procedures, students are expected to maintain respectful behavior towards everyone, submit their work on time, and participate in activities. They will be graded based on their effort and performance.

When you have questions or wish to talk with me about your child, please feel free to e-mail me at school@gmail.com or to call me at school. Our number is 888-888-8888.

I am looking forward to working with my new students this year. I am also looking forward to meeting you and working with you to help your child succeed.

Sincerely,

Nahian Sharif
Computer Science Teacher
